

CSS Output Tracking Questions with Visual Layouts

Question 1: Box Model

HTML Box

HTML

(Large Margin)

CSS

Browser View:

-----+
 | HTML |
 -----+

Large Empty Space

$$\begin{array}{c} +-----+ \\ | \qquad \text{CSS} \qquad | \\ +-----+ \end{array}$$

Expected:

- HTML appears first.
- CSS appears below with a larger gap due to margin.
- HTML has larger padding.

Question 2: Relative Position

Without CSS positioning:

HTML
CSS
JS

would appear as

Before:

```
+-----+
|   A   |
+-----+
```

```
+-----+
|   B   |
+-----+
```

After CSS (left:80px; top:-40px):

```
+-----+
|   A   |
+-----+
      +-----+
      |   B   |
      +-----+
```

Expected:

- B moves right and upward.
- B partially overlaps A.
- Original space is preserved.

Question 3: Absolute Position

```
.container{
```

```
    width:300px;
```

```
    height:200px;
```

```
    border:2px solid black;
```

```
    position:relative;
```

```
}
```

```
.red{
```

```

width:80px;

height:80px;

background:red;

position:absolute;

top:20px;

left:20px;
}

```

```

.blue{

width:80px;

height:80px;

background:blue;

position:absolute;

bottom:20px;

right:20px;

}

```

After CSS (top:40px; left:150px):

```

+-----+
| HTML   |
+-----+

```

```

+-----+
|  JS    |
+-----+

```

```

+-----+
|  CSS   |
+-----+

```

Expected:

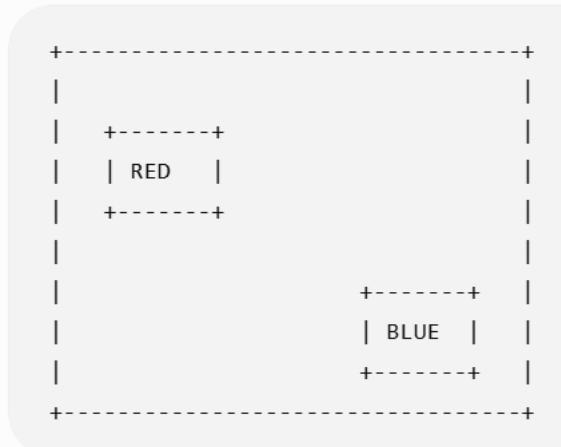

- HTML and JS remain in normal flow.
- CSS is removed from normal flow and positioned absolutely.

```
.container{  
    width:300px;  
    height:200px;  
    border:2px solid black;  
    position:relative;  
}
```

```
.red{  
    width:80px;  
    height:80px;  
    background:red;  
    position:absolute;  
    top:20px;  
    left:20px;  
}
```

```
.blue{  
    width:80px;  
    height:80px;  
    background:blue;  
    position:absolute;  
    bottom:20px;  
    right:20px;  
}
```

Browser Output

```
.container{  
  width:400px;  
  height:250px;  
  border:2px solid black;  
  position:relative;  
}
```

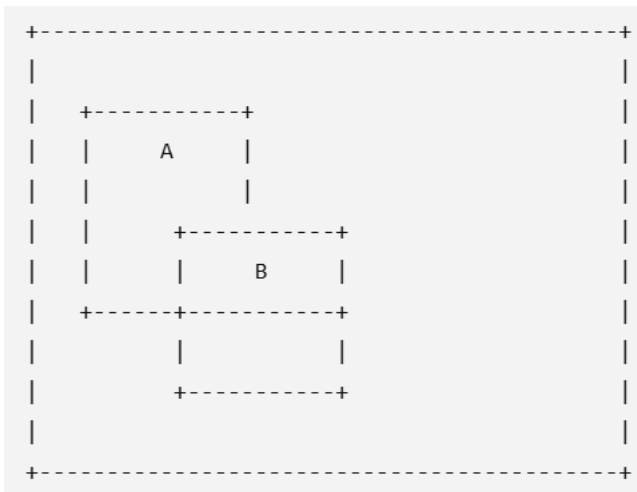

```
.red{  
  width:120px;  
  height:120px;  
  background:red;  
  position:absolute;  
  top:30px;  
  left:30px;  
}
```

```
.blue{
```

```

width:120px;
height:120px;
background:blue;
position:absolute;
top:80px;
left:90px;
}

```

Questions

1. Which box overlaps the other?
2. Which box starts first?
3. Which CSS property allows both boxes to overlap?

```

.container{
  position:relative;
  width:350px;
  height:250px;
}

```

```

.green{
  width:120px;
  height:120px;
  background:green;
  position:absolute;
  left:20px;
}

```

```

    top:20px;
    z-index:1;
}

.yellow{
    width:120px;
    height:120px;
    background:yellow;
    position:absolute;
    left:60px;
    top:60px;
    z-index:3;
}

.pink{
    width:120px;
    height:120px;
    background:pink;
    position:absolute;
    left:100px;
    top:100px;
    z-index:2;
}

```
